20130422 LPR SSP2 CPG Prog to EPA.pptx

Stephanie:

Attached are figures and maps that summarize the CPG's approach to a SSP 2 sampling program. Nonetheless, as you and I discussed on Friday as well as my 4/18 email to you, the CPG believes that the current sediment data in the upper LPRSA are sufficient to address the nature and extent of contaminated sediment and complete the RI/FS.

The proposed CPG program and its DUOs would support the RI/FS by improved understanding of sediment deposits in the river, but are not required to complete the RI/FS.

Please contact me with any questions.

R/  
Rob
